What is the main controversy in which the two activity to business and prosperity to the Country; the other Party, seeing that this extension of artific Capital and Credit would be under the control of a few chartered corporations or monopolies, have at tacked it violently and advocated a return to a Sp cie Currency.

This whole strife about the Currency is about could effect a vast deal more for the prosperity increase Production or real Wealth, than by striving to increase or decrease the Currency? It is, most certainly. If they were to increase ten-fold the Circulating Medium or the quantity of Money in the Country, they would not increase the Products of Labor or real Riches thereby; every thing would be dearer, and the people would be no better off than before. If, on the other hand, they were to decrease the Circulsting Medium, the Products of Sik Hais.

There is but one remedy, and it is to increase Production by encouraging Industry, (Agriculture. Manufactures and Mechanics,) and by inducing the immense number of Non-Producers to take part in productive Labor. " How can this be done," it will be asked? The simplest means are Association and Attractive Industry.

To those who will not accept these means, we merely say that devices like a National Bank or a Sub-Tressury can produce no effectual results, and that in advocating the one or the other, they are A VISIT.—We understand that the members of the Daniel D.
